

The 1200 combines all the quality and performance features the industry demands into a single, economical palletizer. It's fast, reliable, modular and flexible. Quite simply, the 1200 is the best palletizer value on the market today.

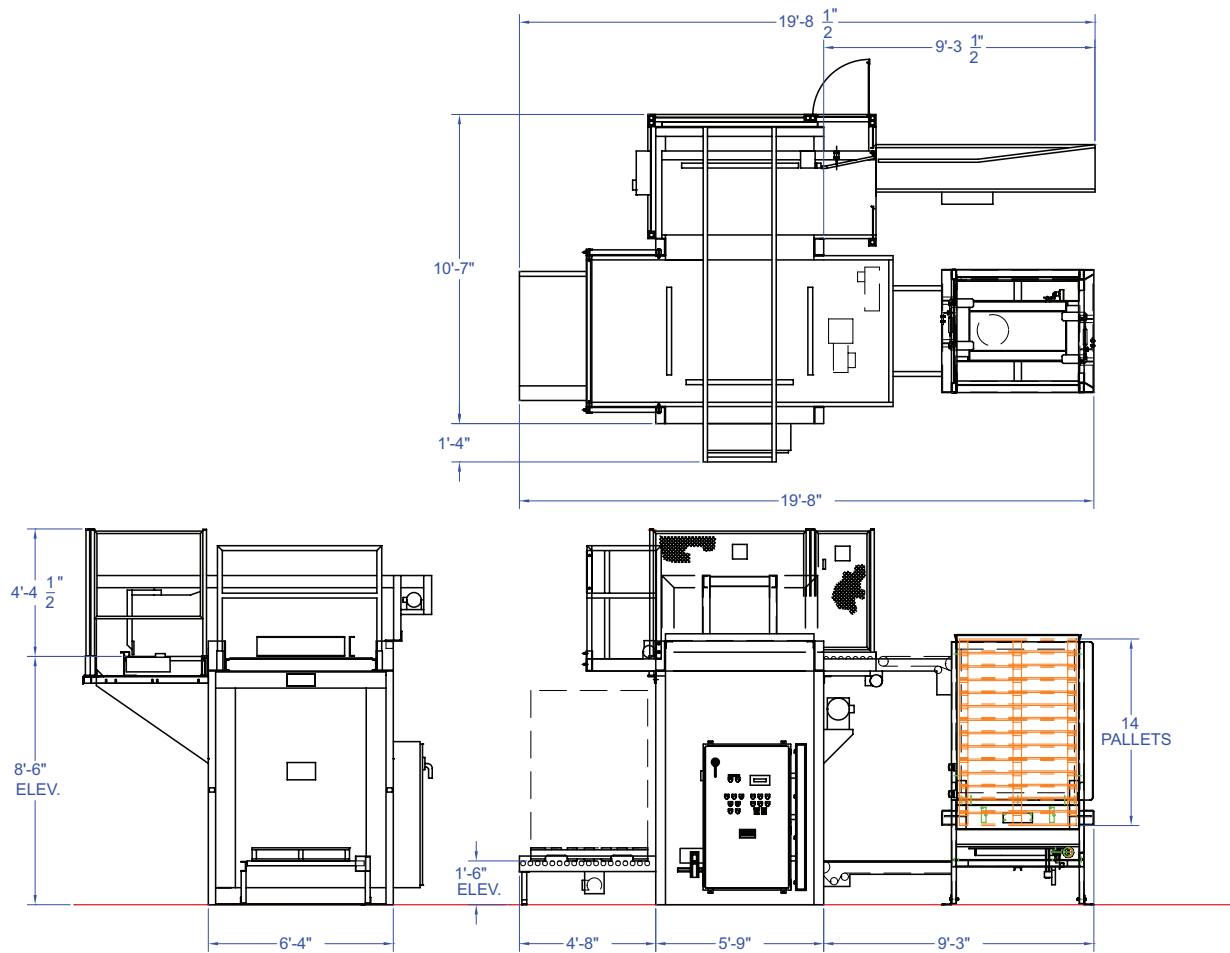

Features and Benefits

- Up to 50 cases per minute (based on layer pattern)
- High infeed uses less floor space
- Four-corner, chain-driven pallet suspension system supports the heaviest loads
- Extended vertical sides on pallet dispenser
- Multiple layouts
- Efficient- a single person is needed to load and unload pallets
- Automatic stacking and layer pattern
- Eliminates hand stacking and potential back injuries
- User-friendly operation, simple controls
- Allen-Bradley® Programmable Logic Controller (PLC)
- Remote operator controls
- Simple installation
- 2-year warranty

Options

- High capacity intermediate layer forming conveyor
- Extra load size capacities for all three dimensions
- Slip sheet and tie sheet dispenser
- Low level pallet/sheet detectors
- Production counters and program controller
- Electronic controls are compatible with your plant standards
- Infeed and discharge conveyor systems
- Labels out rotate device
- Palletless construction

SPECIFICATIONS

Speed

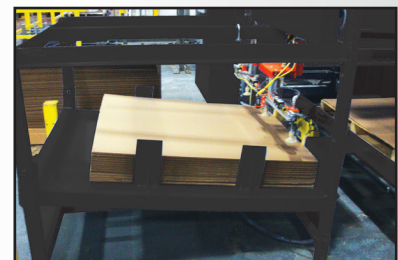

- Up to 50 cases per minute (based on layer patterns)

Power Requirements

- Electrical: 230/460v, 3Ph, 60Hz, 30A
- Pneumatic: 80 psi, 4 SCFM

Max Load Size

- 600 lbs. per layer, 4000 lb. load with 70" high pallet

Sheet Dispenser

User-Friendly Operator Controls
